EXPRESSION OF ITALIAN ENGINEERING

Situated near Rome, in an exceptional area known as “Italy’s ceramic district”, Catalano’s sole global production site includes R&D, labs, management and production departments. This unique organisational structure has led to effective synergy and constant collaboration among the different teams in the company. “Made in Italy” is a brand synonymous with excellence, reliability, talent and innovation. These features have influenced all of Catalano’s choices and the values which have made Catalano a leading exporter of Italian ceramics all over the world.

175.000 Sqm: the surface of Catalano’s plant, 70,000 which are covered.

1.500 Pieces produced per day.

100 Countries where our products are distributed.

240 People (workers and employees).

53 Years of history.

240 Products in our catalogue.

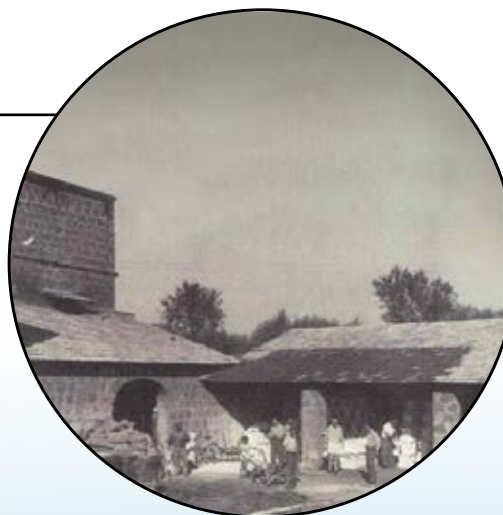

OUR QUALITY IS MADE OF PEOPLE, HISTORY AND CHALLENGES

Over 50 years ago, in a region traditionally committed to ceramic production, Catalano was founded by a group of skilled people, able to blend passion, ambition and knowhow. Catalano has evolved from artisan manufacturing to industrial production, without compromising on Italian design and quality. Products are still hand finished with Catalano's signature expertise but the company today has incorporated technical skills and entrepreneurial spirit, becoming an award-winning bathroom brand worldwide. Over the years the company has continuously invested in training, in searching for the best raw materials and in technological advancement for products with beautiful designs, superior quality and sustainable attributes. Catalano continues to lead the way in product innovation, smart manufacturing and green thinking in the sanitary ware sector.

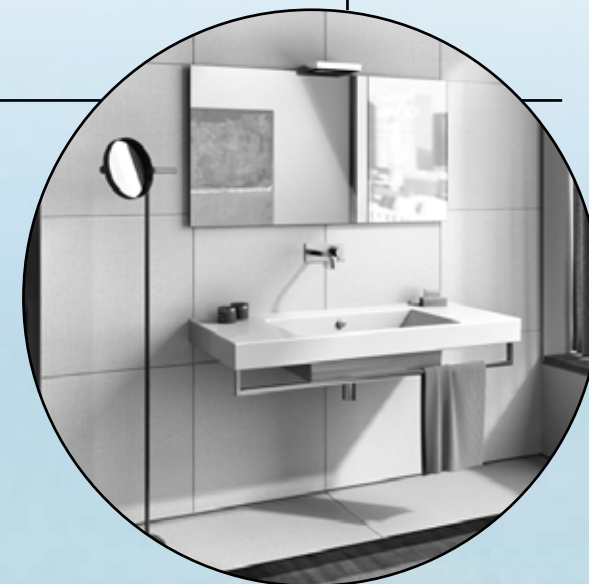

ORIGINS 1967 – 2000 ○

Founded in 1967 by a small group of skilled individuals, Catalano took its name from an area near Civita Castellana, a town not far from Viterbo, now known as 'Italy's ceramic district'. Current CEO Mario Rossi joined the newly formed company as a young man. He soon started to envision a different company; environmentally responsible, able to invest in quality, innovative, and with an attention to design and customer care.

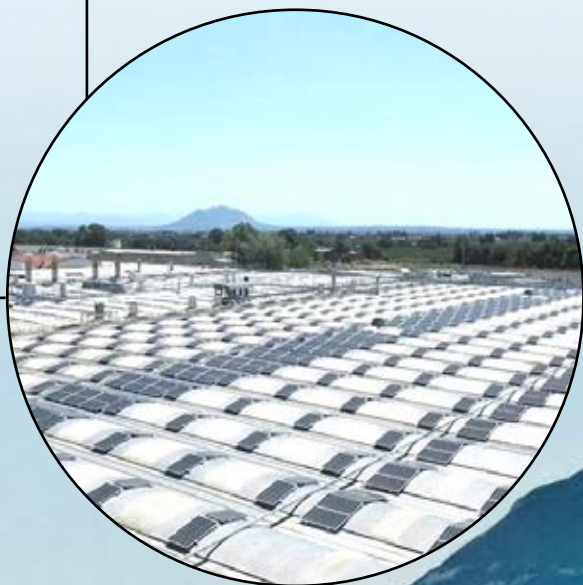

EVOLUTION 2000 – 2010 ○

2000 saw the introduction of the Zero collection. A modular & versatile range, the success of Zero transformed the company. Collaborations with respected designers soon followed, such as Matteo Thun, who signed the Roma and Muse collections, and the Fuksas Studio who helped design the Impronta range. The architect Carlo Martino also joined the company, as artistic Director and head of Catalano's Corporate Design Center.

2010 – PRESENT

A passion for quality and a desire to make a sustainable product, led Catalano to invest significantly in the manufacturing process in 2010. The introduction of high pressure casting, advanced automation & digital technology, has helped Catalano become one of the most iconic & technologically advanced ceramic producers in the world today, able to produce in such a way as to increase quality whilst reducing energy consumption.

LEGACY & LOOKING TO THE FUTURE

A 'Think Green' ethos, encompassing not only the manufacturing process, but also sustainability of the product itself with the innovative Cataglaze+ treatment, and the award winning Newflush WC's. In recognition of their work, 2016 saw Mario Rossi & Catalano awarded with the Aldo Villa award for outstanding contribution to the development of the ceramic industry in Italy and Worldwide.

The Art Of Ceramic

10

INDUSTRY 4.0

The first of its kind in the world of sanitaryware manufacturing, Catalano operates a fully digital production facility from product conception, to manufacturing, logistics and packaging. This allows for ultra-efficient manufacturing at every step, leading to reduced wastage and less energy consumption due to the increased ability to monitor factory performance.

ADVANCED AUTOMATION

The use of advanced automation throughout the production process enables Catalano to produce ceramic to a higher quality than traditional methods of production. Because of this we are able to produce thinner, stronger and larger pieces of ceramic than ever before, pushing the boundaries of design and performance, ensuring the product you receive not only looks great, but lasts a lifetime.

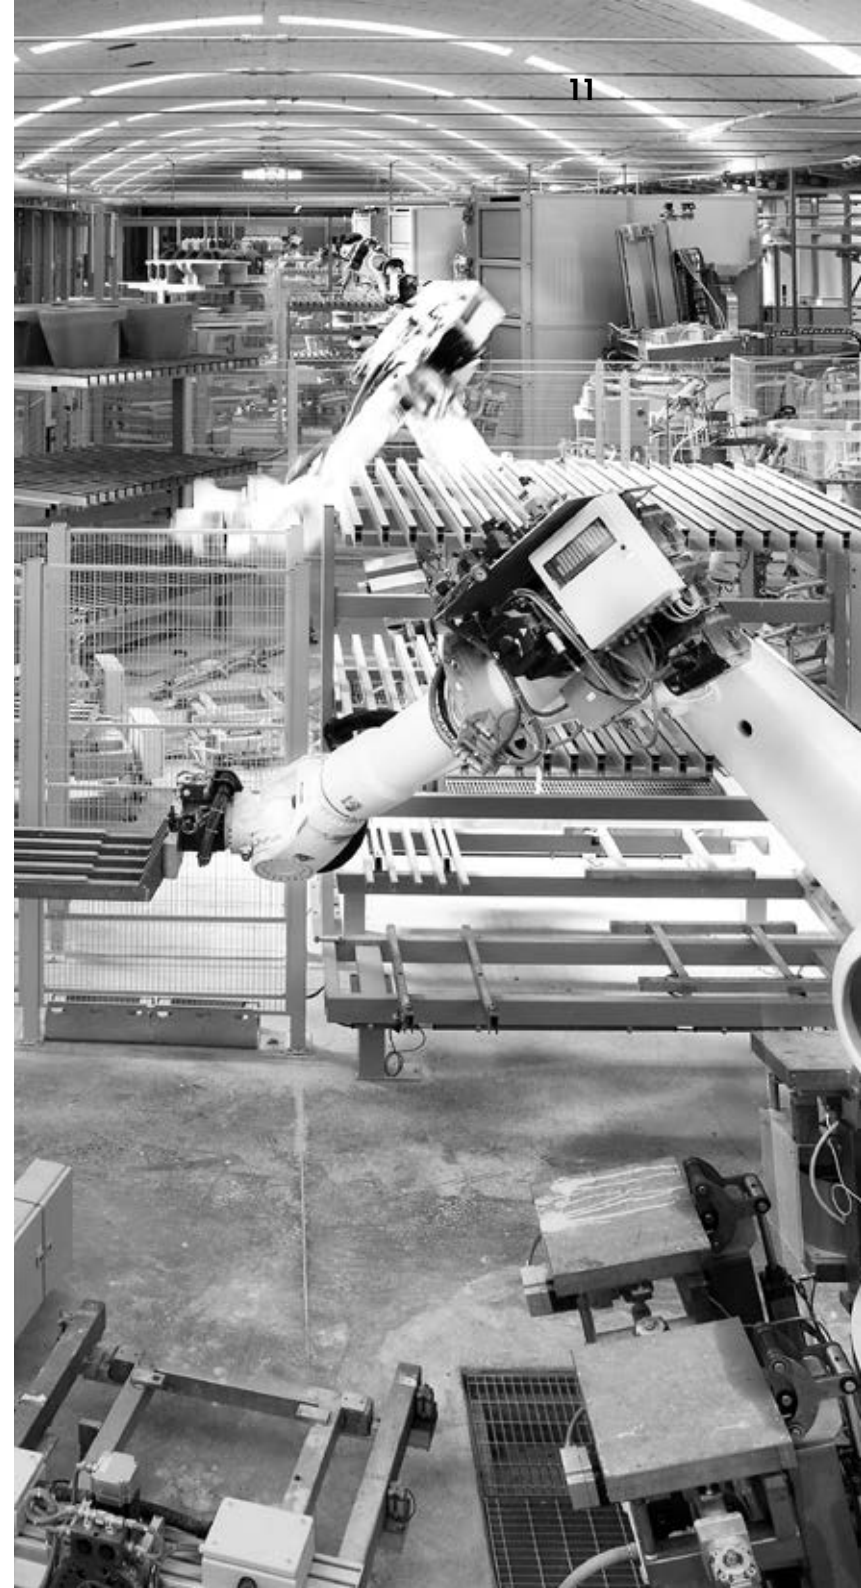

ATTENTION TO DETAIL

The importance of raw material in ceramic production can be likened to a chef cooking with the best ingredients: The better the ingredients, the better the final product. Catalano has created a careful blend of kaolin, minerals & fire clay, completely unique to them and responsibly sourced from only the best quarries around the world. Starting with our first class raw materials, we then monitor the production process through every single step, so that the Catalano ceramic which reaches your home is of the absolute highest quality.

THE CATALANO FAMILY

We consider all of our 250 workers, and our partners worldwide as family. Without them, our dream of innovative ceramic production, our passion for quality and design, is not possible. The last 10 years of investment have focused on creating a harmonious, safe workplace. Situated at the foot of mount Soratte and surrounded by fields, our production facility is as green inside as it is out. A perfect environment for our family to thrive.

RESPECTING EMPLOYEES, WORKPLACE AND ENVIRONMENT

The important certifications obtained confirm the achievements reached to date and highlight the reliability, commitment and awareness of Catalano in facing the issue of environmental impact. Catalano has implemented policies aimed at reducing water consumption and optimising the logistics and managing of resources in a systematic way. The onsite solar power plant generates 25% of the total energy requirements. Catalano “Thinks Green”. Catalano is the first company in the sanitary ware sector to obtain the ESG (Environment, Social, Corporate Governance) certificate.

Environmental Product Declaration (EPDITALY0075). Product certification focusing on the environmental performance of the Life Cycle Assessment (LCA).

ISO 14001:2015 (182097- 2015-AE-I-TA-ACCREDIA) Certificazione per gli aspetti ambientali. Certification for Environmental management system.

Certification given by The Water Label Company which attests a reduced water consumption. A performance classification indicates the flow rate (litres/minute) when flushing the toilet.

Cataglaze® + treatment is eco-friendly because by facilitating cleaning, there is a reduction in the use of detergents and less pollution by chemical agents.

THE INNOVATIVE ANTIBACTERIAL GLAZE IS STANDARD ON ALL CATALANO PRODUCTS

Antibacterial protection

99,99 %

When a bacterium comes into contact with the surface glazed with Cataglaze+ Silver Titanium, the silver and titanium microparticles penetrate inside the cell wall of the bacterium, causing its lysis.

Cataglaze®+ Silver Titanium

Traditional glaze

Differences when comparing the glazes

Cataglaze®+ Silver Titanium is an evolution of the original Cataglaze® glazing system; besides making surfaces more resistant to limescale and therefore easier to clean, its powerful antibacterial action kills germs and bacteria. The new formula contains silver and titanium ions, which, once activated, deliver an effective and complete protection. The antibacterial action is ISO 22196 certified and is 99.99% effective.

THE REVOLUTIONARY ANTIBACTERIAL FORMULA FOR ALL TOILET SEATS

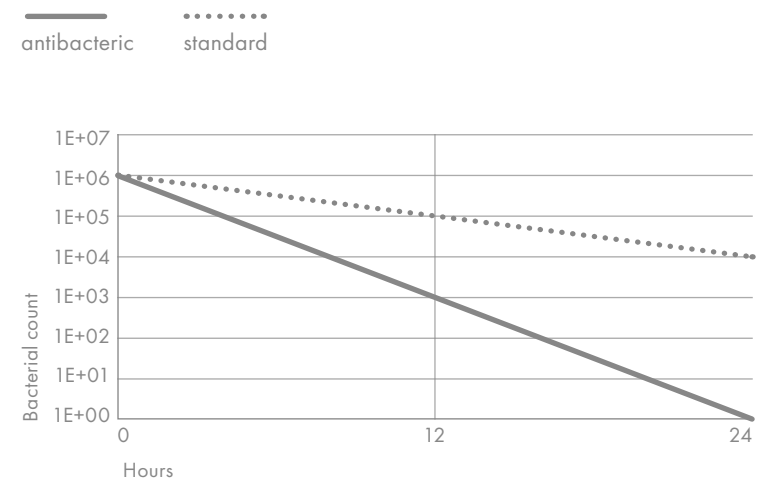

Silver Antibacterial protection

99,99 %

Certified antibacterial effect

For improved hygiene, all Catalano toilet seats are produced with FDA and EPA registered resins, able to inhibit the growth of germs and bacteria thanks to the properties of silver ions. The antibacterial action is ISO 22196/JIS Z 2801 certified and is 99.99% effective.

Vortex-flushing

SUPERIOR SILENT CLEANING

Vortex flushing

More silence

New flush without rim

More hygiene

With Catalano's Newflush® powerful vortex system, the WC flushing performance is optimised for a cleaner pan. This technology guarantees more silent flushing, a lower consumption of water and an effective cleaning action. With no rims, there is a continuous surface for easier cleaning. So, Newflush® means more hygiene and more environmental sustainability.

newflush[®]

SILENCE IS GOLDEN

Our vortex flush is also more silent than traditional WCs. Imagine waking up in the middle of the night, and not wanting to flush the toilet for fear of waking up the whole family. Well, Catalano's Newflush WCs provide a solution - flushing at a sound level of 62 decibels compared to 72 decibels on a standard WC. To illustrate, 63 decibels is the equivalent of your shower on full blast, water reverberating off the shower tray. Noisy, we know! 63 decibels is the sound of an air conditioning unit..... at a hundred feet! So silent you could almost hear a pin drop!

CATACLEAN

All in One Concept

ALL IN ONE CONCEPT

CATACLEAN

Advanced technology, ease of use, and perfect hygiene merge in a unique concept of smart modularity. This toilet-integrated technological system consists of various elements that can also be separated.

For example, the electronic bidet can be removed for update or maintenance purposes without altering the toilet's functions. This way, the latter can work independently through the patented exhaust system.

CATACLEAN TECHNOLOGY

CATACLEAN

Cataclean is where Catalano's technology and top-quality ceramic meet. This system includes washing and drying functions through stainless steel water nozzles. It also features self-draining and self-cleaning anti-limescale functions to ensure hygiene and safe maintenance. All functions can be managed from a wall-mounted display.

TOILET BIDET INTEGRATED

CATACLEAN

The only one of its kind, Cataclean provides an easily removable electronic bidet, that can be installed or replaced very easily like a cartridge. It is inserted into the toilet bowl from above and is completely disconnected from its casing and from the seat. The toilet always works, even without the electronic body.

REMOTE CONTROL

CATACLEAN

Versatile design with a remote-control panel that can be removed and installed on the wall. It's simple and functional. The ring nut and function keys allow you to control all functions easily. The remote-control panel has a touchscreen and lights up thanks to a proximity sensor.

HORIZON

Thin and soft lines define the Horizon look. The collection includes basins for wall mounted, sit on and furniture installation. Create a clean contemporary look with the Catalano Ceramic Top or for generous storage, choose a furniture basin with the on trend fluted drawer unit. Horizon basins are available in different finishes.

GREEN

Square but soft, the Green collection has a modern look with gentle curves. With basins suitable for wall mounted, sit on and furniture installation, many looks can be created. The Green furniture collection is equally versatile.

GOLD & SILVER

Inspired by traditional techniques used for producing high quality jewellery, the Gold and Silver Collection finishes are created from pure silver and 18K gold.

Luxurious looks with a highly scratch resistant finish.

Gold&Silver

TECHNOLOGY & PRECIOUS ELEGANCE

Gold | Black

Gold | White

Silver | White

Glossy glaze

CATAglaze+
Silver Titanium

Unscratchable Glaze

Catalano's experimentation with precious finishes has led to the development of an exclusive production process for applying a "skin" of 18k gold and pure silver on sanitary-ware items. These precious finishes are the result of a special vitrification process which results in a much higher resistance to abrasions, detergents and thermal shock than standard glazes. The brightness of metals combined with white and black colours create an elegant and sophisticated aesthetic solution.

FUTURE OF CERAMICS

Today more than ever, “doing business” means understanding the present to forecast the things to come. The company evolution is the result of an innate attention to technological innovations. Innovations that have caused a paradigm shift in designing, producing and responding to market demands, which are increasingly complex and globalised. Resource management, design, modelling and production phases are managed by fully digital and automated systems. The use of advanced automation throughout the production process enables Catalano to get the maximum optimisation of all the production steps.
